DURABILITY + STRONGER LOCKING SYSTEM

HD mineral core primarily means extremely strong locking system what gives the whole flooring system a maximum durability. Despite of small thickness of the plank our locks are 2 times stronger than average LVT locks available on the market.

LOCKING STRENGTH (ISO 24334)

AMARON

FLOOR
HEATING

UNDERFLOOR HEATING

Very low thermal resistance of our floors means more effective use of the underfloor heating system. Thanks to HD mineral core less fuel is needed for floor heating and over 60% less carbon is released into the atmosphere from one household in Europe, each year.

THERMAL RESISTANCE (EN 12664) up to 0,033 m² K/W

5G® LOCKING SYSTEM is based on a single action installation method. The boards are locked on the long side with a traditional angling method. When a panel is folded down, a flexible plastic tongue is pushed into a tongue-groove. As the panel reaches its final position, the locking tongue snaps out into a wedge groove, emits a "click" sound and locks the product vertically. Floor installation has never been easier.

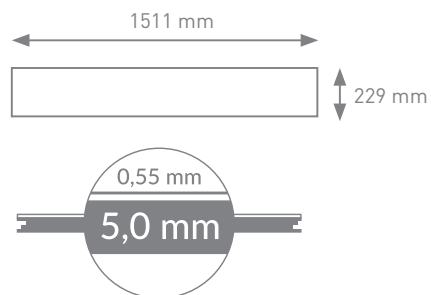

2G® LOCKING SYSTEM is a strong and durable mechanical locking system installed by angling. Suitable for all panel widths, vertical and horizontal locking. Robust and easy floor installation.
